PROFESSIONAL SUMMARY

React-focused Computer Engineering student experienced in building responsive web interfaces, React Native mobile features, and polished front-end projects. Developed React-based applications including an automated attendance and monitoring system web app, a deployed law firm website, a rehabilitation website, and an interactive maze solving game. Comfortable with component architecture, state-driven UI, accessibility, SEO basics, and clean delivery workflows.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, C++
Frontend	React, Next.js, React Native, Component Architecture, State Management, Responsive UI
Web	HTML, CSS, Accessibility, SEO Basics, Performance Optimization
AI / ML	Machine Learning, Computer Vision, YOLO, OpenCV
Tools & Platforms	GitHub, Jira, Notion, n8n, AWS
Certifications	AWS Academy Graduate - Cloud Foundations

WORK EXPERIENCE

Internee | *Nexentra Solutions* | Jun 2025 - Oct 2025

- Contributed to mobile application development using React Native, applying component-based architecture and state management practices.
- Collaborated with senior engineers on feature implementation and delivered assigned tasks within project timelines.
- Adapted quickly to new tools and frameworks while maintaining clean, reusable front-end code.

EDUCATION

B.Sc. Computer Engineering | *Information Technology University, Lahore* | Aug 2022 - Jun 19, 2026

- CGPA: 3.25 / 4.0

Relevant Coursework:

- **Programming Fundamentals, Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Machine Learning, Computer Vision**

PROJECTS

Automated Attendance & Monitoring System Web App - *React, JavaScript, UI Development* | Final Year Project

- Built the React web application for an automated attendance and monitoring system, focusing on clear user flows and dashboard-style interaction.
- Created reusable front-end components for attendance views, monitoring outputs, navigation, and status summaries.
- Aligned the web interface with the underlying computer vision pipeline so users could review attendance and monitoring results efficiently.

Law Firm Website - *Next.js, React* | Jun 2025

Link: <https://lawfirm-liard.vercel.app/>

- Designed and deployed a fully responsive, professional law firm website with a clean UI and optimized performance.
- Implemented SEO best practices and accessibility standards to maximize client reach.

Rehabilitation Website - *React, Responsive Web Design* | React Project

- Developed a responsive rehabilitation-focused website in React with structured pages and user-friendly navigation.
- Built reusable UI sections for service information, calls to action, and content presentation across screen sizes.

Maze Solving Game - *C++, Data Structures & Algorithms* | Nov 2023

- Implemented a maze-solving game using graph traversal algorithms including BFS and DFS.
- Engineered efficient pathfinding with visual maze rendering for an interactive user experience.

ADDITIONAL INFORMATION

Languages: English (Fluent), Urdu (Native), Punjabi (Native)

Interests: React Development, Responsive Interfaces, Web Performance, UI Engineering
